Marketplace product descriptions: 8 listings, mixed categories

Work sample by AUTOMAIT. Fictional brief and brand; no client. AI-assisted; checked against the brief before delivery.

Brief / what the client asked: "Write SEO-friendly listings (title, bullets, description) for 8 products across our store. Keep each description between 60 and 120 words. We'll give you the spec sheets."

All brands and products are fictional. Brand names were checked against a web search and the ABN Lookup register on the day of writing (14 Nov 2026). Figures marked `[verify]` come from the client's spec sheet and are checked before the listing goes live. Titles are kept under 80 characters so they survive Amazon, Etsy and Shopify without truncation. Keywords sit where buyers search (first half of the title, first bullet), not stuffed into the paragraph.

---

1. Kitchen · Harrowgate bamboo cutting board set (3 pieces)

SEO title: Bamboo Cutting Board Set of 3 with Juice Groove, Large Medium Small, Harrowgate

Bullets - Three boards (38, 30 and 23 cm) so raw meat, vegetables and bread never share a surface `[verify]` - Deep juice groove on the large board keeps roast and fruit juices off the bench - Inner handle on each board for lifting with wet hands - Oil once a month with food-grade mineral oil (a 50 ml bottle is included) `[verify]` - Hand wash only; bamboo warps in the dishwasher

Description One board for everything is how onion ends up in the fruit salad. The Harrowgate set gives you three sizes: a large board with a juice groove for the Sunday roast, a medium one for daily chopping, and a small one that lives next to the kettle for lemons and garlic. Bamboo is hard enough to hold up to a chef's knife and lighter than a maple board the same size. Each board has a cut-out handle so you can lift it to the sink with wet hands. Wipe down, dry upright, oil once a month, and the set stays flat for years. Hand wash only.

2. Pet · Muzzlebrook slow-feeder dog bowl

SEO title: Slow Feeder Dog Bowl for Medium to Large Dogs, Anti-Gulp Maze 1.2 L, Muzzlebrook

Bullets - Spiral maze slows a two-minute meal to eight to twelve minutes for most medium and large dogs `[verify]` - 1.2 litre capacity, suits dogs from about 12 kg `[verify]` - Non-slip rubber base so the bowl stays put while the dog works at it - Food-safe, BPA-free plastic; top-rack dishwasher safe `[verify]` - Not suitable for very flat-faced breeds, which can struggle to reach the base

Description If your dog finishes dinner before you have put the scoop away, this bowl is for them. The Muzzlebrook maze makes the dog eat around raised ridges, so each mouthful is smaller and slower. Slower eating means less gulping of air, which is the usual cause of post-meal burping and that frantic look for more. The rubber base grips tiles and floorboards, so a determined labrador cannot skate it across the kitchen. It holds 1.2 litres of dry or wet food and goes in the dishwasher. One note from us: flat-faced breeds such as pugs find deep mazes hard going, so this is not the bowl for them.

3. Tech accessory · Voltaro 65W GaN USB-C charger (3 ports)

SEO title: 65W USB-C Charger, 3-Port GaN Fast Charger for Laptop and Phone, Voltaro

Bullets - 65W from a single USB-C port charges most 13 to 14 inch laptops at full speed `[verify]` - Two USB-C and one USB-A port; charge a laptop, phone and earbuds from one wall socket - GaN components keep it about half the size of the charger that came with your laptop `[verify]` - Folding plug, 110 g, fits in a jacket pocket `[verify]` - Over-current, over-heat and short-circuit protection; 18-month warranty `[verify]`

Description The laptop brick, the phone cube and the earbuds cable all compete for the same two sockets at the café. The Voltaro 65W replaces all three. Plug the laptop into the top USB-C port and it charges at full speed; add a phone and earbuds below and the charger shares the power between them. Gallium nitride parts run cooler and smaller than older silicon chargers, which is why this one is about the size of a matchbox and weighs 110 g. The plug folds flat so it will not scratch your laptop in the bag. Cables are not included; use a USB-C cable rated for 60W or more.

4. Beauty · Saltmarrow unscented shea hand cream (75 ml)

SEO title: Unscented Shea Butter Hand Cream 75 ml, Fragrance Free, Saltmarrow

Bullets - No added fragrance, dye or essential oils; made for hands that react to scented creams - 20 per cent shea butter plus glycerin for dry, cracked knuckles `[verify]` - Absorbs in about a minute, so you can go back to the keyboard without greasy keys - 75 ml aluminium tube, travel-cabin friendly - Not tested on animals; made in Australia `[verify]`

Description Most hand creams smell like something. This one does not, on purpose. Saltmarrow made it for people who wash their hands thirty times a day (cooks, nurses, new parents) and are tired of creams that sting on cracked skin. The formula is 20 per cent shea butter with glycerin to pull moisture into the skin, and nothing added for scent. Rub a pea-sized amount into the knuckles and cuticles, and it is absorbed before you have finished

reading this. The tube is aluminium rather than plastic, so you can roll it down to the last gram. If you have a diagnosed skin condition, check the ingredients list with your doctor first.

5. Home office · Deskford monitor riser with drawer

SEO title: Monitor Stand Riser with Drawer, Bamboo Desk Shelf 55 cm, Deskford

Bullets - Lifts a monitor 10 cm, which puts the top of a 24 to 27 inch screen roughly at eye level for most seated adults `[verify]` - Full-width drawer swallows pens, cables, the stapler and the second set of keys - 55 cm wide, holds up to 20 kg `[verify]` - Solid bamboo top; wipe clean with a damp cloth - Assembles with four screws and the included key

Description The stack of books under your monitor was always a temporary fix. The Deskford riser lifts the screen 10 cm, which for most people means looking straight ahead instead of down, and the space underneath becomes a drawer. Pens, charger, sticky notes and the lanyard you never wear slide out of sight, and the desk looks like you tidied it. The top is solid bamboo and takes a 27 inch monitor or a laptop with room to spare at 55 cm wide. Four screws, one included key, about five minutes. It arrives flat and the box doubles as the recycling you were going to take out anyway.

6. Fitness · Tugwarden resistance band set (5 bands)

SEO title: Resistance Bands Set of 5 with Handles and Door Anchor, up to 68 kg, Tugwarden

Bullets - Five colour-coded latex tubes from 4.5 kg to 22 kg; clip two or more together for up to 68 kg `[verify]` - Padded handles, two ankle straps and a door anchor included - Carabiner clips let you change resistance in seconds between exercises - Packs into the included 20 cm bag; weighs under 1 kg for travel `[verify]` - Printed guide with 12 starter exercises; check the bands for nicks before each use

Description A gym membership you use twice a month costs more than this set does once. Tugwarden's five bands clip onto the handles in any combination, so the same kit does a light warm-up and a heavy row. Hook the door anchor over the top of any door for pull-downs and chest presses; strap the ankle cuffs on for glute work. The whole set fits in a bag the size of a lunch box, which is why it ends up in suitcases more often than it stays home. The bands are natural latex, so check for small cuts before each session and replace a band when you find one. Made for home use, not for commercial gyms.

7. Kids · Little Quillfeather wooden stacking rainbow (7 arches)

SEO title: Wooden Stacking Rainbow 7 Piece Toy, Non-Toxic Paint, 12m+, Little Quillfeather

Bullets - Seven arches in solid beech, finished with water-based, non-toxic paint `[verify]` - Largest arch 24 cm wide; pieces are too big to swallow `[verify]` - Stack, nest, build bridges, tunnels and bedrooms for small toys - Sanded edges, no splinters, no small parts - Meets the toy safety standard for the client's market `[verify, cite standard]`

Description A rainbow is the toy that keeps changing jobs. At one it is something to knock down. At two it is a tunnel for cars. At four it is a bed for a doll, a balance beam for a dinosaur, and the roof of a house that needs the big arch to stay standing. Little Quillfeather cuts each arch from solid beech, sands the edges smooth and paints them with water-based, non-toxic colour. The pieces are chunky, so they survive being thrown and they are too large to swallow. Wipe clean with a damp cloth. For ages 12 months and up; keep an eye on younger toddlers as with any wooden toy.

8. Outdoor · Thornbury insulated water bottle (1 L)

SEO title: Insulated Water Bottle 1 L Stainless Steel, Cold 24 Hours, Leak Proof, Thornbury

Bullets - Double-wall stainless steel keeps drinks cold about 24 hours and hot about 12 `[verify]` - 1 litre, so it is one fill for a long walk or a full workday - Leak-proof screw lid with a carry loop; fits most car cup holders at 8.5 cm across `[verify]` - Powder coat finish that does not sweat or slip in a wet hand - Hand wash recommended; lid is dishwasher safe `[verify]`

Description The bottle that is still cold when you get back to the car. The Thornbury 1 litre is double-wall stainless steel, so ice is still rattling around after a day in a backpack, and morning tea is still hot at lunch. A litre means one fill in the morning instead of three trips to the tap. The screw lid seals properly, so it can lie flat in a bag next to the laptop. At 8.5 cm wide it still fits a standard cup holder, and the powder coat gives you something to grip when your hands are wet. Hand wash the bottle, and put the lid in the dishwasher.

Notes for the client

- Each description runs 60 to 120 words; bullets carry the specs so the paragraph can talk to the buyer.
- Every number is tagged `[verify]`. We do not publish a capacity, weight or safety claim we have not seen on your sheet.
- Comparisons are to a category ("the charger that came with your laptop"), never to a named competitor.
- Spelling is Australian here; US or UK on request, applied to the whole set so nothing is mixed.
